## COVID-19 Response and Status

2020.03.23

As the State of Delaware has recently provided new guidance on shelter-in-place and non-essential business closures, we would like to provide an update on our status in support of our valued customers.

### **Accudyne will remain open during the Delaware non-essential business shutdown.**

Our business is a critical part of the economy in Delaware as a manufacturer and seller of industrial equipment serving multiple industries across the world. This is a responsibility we take very seriously along with the health and wellbeing of our workforce and their families. Based on guidance received from both local and federal government and public health officials, we have altered our standard operating practices in an effort to do our part to limit the spread of the virus and protect our customers and employees.

*1st:* Some engineering, design, and administrative staff have been transitioned to work remotely. This also allows us to practice effective social distancing within our workspace and reduce our daily in-office population.

*2nd:* We are sanitizing surfaces and touch points in common areas daily. This further protects our employees and guests from the spread of the virus.

*3rd:* We are limiting the amount of travel our employees do as well as the number of guests we allow in our facility. We will be placing a hold on any air travel until further notice and only essential personnel will be allowed entrance to our facility.

Our hope is to minimize project interruptions or delays, and we ask for your patience and understanding as we work through these challenging circumstances together. Many of our vendors are also essential businesses and have communicated their commitments to us, but they will have impacts to their workforce and lead times, as well. Interruptions or delays to individual projects will be communicated and coordinated on a case by case basis.

We also take our responsibility to our local communities very seriously. Accudyne has been in contact with the Delaware State Government and local healthcare provider organizations to offer our support in the form of engineering, design, 3D printing, and other services.

At this point in time, Accudyne still has normal operating hours and staff working each weekday. Please give us a call if you have any questions.

We sincerely hope that you, your colleagues, and families remain safe and healthy through this pandemic.

**Sincerely,**

Ralph Cope, Mark Gruber, and Stephan Zweidler  
Managing Partners, Accudyne Systems
